PERIODICALS IN THE D O T LIBRARY

In recent years, as DOT Library staff members were consolidating and standardizing manual subscription files, plans were made to automate records for the dual purpose of contributing to the acquisitions and renewal process and also producing a list of periodicals and journals received in both library locations. Collection and verification of bibliographical data were begun two years ago by members of the Serials Section. The Periodicals Management System was designed, and the first benefits were obtained for the 1977 renewal of purchased titles during the Fall of 1976. Efforts were then undertaken to make the data base more comprehensive by identifying and adding subscriptions received on a complimentary basis. Predecessor titles were also added for active subscriptions. The Library's holdings of titles which ceased in the past were omitted, but these will be included in future editions of this publication.

This list is current as of October 1977. We hope that we have provided a useful record of our periodical holdings for our users. In spite of our best efforts, we expect errors to be found. Suggestions for improvement of our records should be directed to the Serials Section, Department of Transportation Library.

GUIDELINES FOR USERS

Contents and Arrangement:

This list includes periodicals, journals and newspapers currently being received in the two locations of the DOT Library. It also includes some annuals, loose-leaf services, and proceedings and transactions of societies, when these are acquired on a subscription basis. Preceding and continuing titles are given when appropriate.

The list is arranged alphabetically by main entry or title. Articles at the beginning of a title, regardless of language, are placed at the end of the title in parentheses. Abbreviations have been kept to a minimum. To aid in identification, the names of the city or country where certain periodicals are published have been added after the title. Periodical titles beginning with letters or initials are filed as a group at the beginning of the respective letter.

The data provided for each title in this list are:

Main entry, if any (i. e., association or organization which issues the periodical).

Full title.

Edition, if any.

International Standard Serial Number (ISSN).

Library location symbol:
- HQ (Headquarters Library at 400 Seventh St., S.W.)
- 10A (FOB 10A Branch Library at 800 Independence Ave., S.W.)
- 10A MED (Medical Collection in FOB 10A Branch Library)
- HQ LAW (Law Collection in Headquarters Library)
- 10A LAW (Law Collection in FOB 10A Branch Library)

Beginning volume number of holdings, if assigned, and year of volume (in parentheses).

Ending volume number of holdings, if assigned, and year of volume (in parentheses) or "TO DATE".

Related titles (designated by "Continues" and "Continued by").

Call number (for the few titles which have been cataloged and classified, and are shelved by this number).

Physical Location and Shelving Arrangement:

Periodicals in the DOT Library are arranged on shelves alphabetically by title or issuing organization. Titles designated as LAW are shelved in the separate Law collections in each building; the titles coded 10A MED are shelved apart from the 10A general collection.

Other shelving details include the keeping of current issues of high-interest titles on periodical display shelves. Older volumes, along with those bound, are shelved in another area. A special arrangement in each location is the separation of abstract and indexing journals for shelving near the Reference areas. The microfilm editions are filed in cabinets near reading equipment.

Library staff members are available to assist users in locating specific issues.

Use:

Our periodical collection is maintained primarily for the use of DOT personnel. Some titles (usually received in more than one copy) are routed to Departmental employees upon approval of a written request. Individual issues of most periodicals may be borrowed from the library location indicated, with the exception of abstracts and indexing titles.

We cooperate with other libraries in lending periodicals, subject to interlibrary loan guidelines and procedures.
